

DiGi Electronics HK Limited

One-Stop Solution for Electronic Components

Corporate Brochure

www.DiGi-Electronics.com

DiGi Electronics HK Limited

Your Trusted Global Electronic Components Distributor

DiGi Electronics is a fast-growing global distributor of electronic components, specializing in integrated circuits and semiconductor solutions.

We serve industrial, commercial, and technology-driven customers with reliable sourcing, competitive pricing, and efficient global delivery.

Efficient & Intelligent Procurement Experience

A comprehensive and continuously updated product database, covering both high-demand components and hard-to-find parts, exceeding typical industry offerings.

An intelligent backend system enables fast and accurate part searches, helping customers quickly identify suitable alternatives and matching components.

Easy-to-use comparison tools allow customers to clearly evaluate specifications, alternatives, and technical differences between components.

A clean and intuitive interface improves efficiency, making sourcing and decision-making faster and more comfortable.

ABOUT DiGi

COMPANY INTRODUCTION

1350+

Authorized & Partner Brands

200+

163,000+

Global Customers

DiGi-Electronics

DiGi-Electronics.com is operated by DiGi Electronics HK Limited, a global electronic components distributor focused on integrated circuits and semiconductor products.

Since our establishment, we have been committed to providing authentic components, efficient sourcing, and stable supply solutions to customers worldwide. With strong supplier relationships and a mature logistics network, we help customers reduce procurement risk and shorten lead times.

Established 15+ Years

Since 2010, DiGi Electronics has been dedicated to the distribution of electronic components, building long-term partnerships with manufacturers and customers worldwide.

We represent over 1,300 leading IC brands and support customers across 200+ countries and regions.

Today, DiGi-Electronics proudly serves more than 163,000 customers globally, delivering reliable components at competitive prices.

Business Scope

DiGi-Electronics collaborates with leading electronics manufacturers worldwide to offer a broad and reliable range of components.

Our portfolio includes Integrated Circuits (ICs), semiconductors, IGBTs, FETs, modules, memory, diodes, transistors, rectifiers, and other essential electronic components.

We carefully select products from hundreds of world-class manufacturers to support innovation, production stability, and long-term supply assurance.

DiGi-Electronics —
Powering Innovation with Reliable Components.

Our Products

Comprehensive Component Coverage

We supply a broad range of electronic components, with a strong focus on Integrated Circuits (ICs) and semiconductor products. Our portfolio covers **Analog & Power ICs, MCU/Logic, RF devices, IGBT/MOSFET, diodes, transistors, rectifiers, modules, and memory components.**

We work with **1,300+ global manufacturers**, including leading brands such as ADI, NXP, Infineon, Texas Instruments, Microchip, STMicroelectronics, ON Semiconductor, Vishay, Toshiba, and Intel. From **prototype sourcing to volume production**, we also support **hard-to-find and EOL components.**

Integrity-Driven Premium Service

Customer First

We prioritize responsiveness and reliability to help customers source components efficiently and reduce procurement risk.

Integrity & Transparency

Clear communication, accountable sourcing, and honest lead-time updates—so every order is predictable and traceable.

Reliable Partnership

Long-term collaboration with customers and suppliers enables stable supply solutions in both normal and shortage markets.

Service Commitment

Dedicated support from inquiry to delivery, with professional after-sales assistance and return support when needed.

Fast RFQ Response

Authentic Components

Flexible Sourcing

Global Delivery Support

Stable Supply Network

Authenticity & Quality Control

Competitive & Transparent Pricing

Global Logistics Capability

Professional Customer Support

Why Choose DiGi

Reliable supply, authentic components, and efficient global delivery.

DiGi-Electronics *Your Reliable Partner for Authentic Components and Global Supply.*

Quality Assurance & Returns

Mature and Efficient Logistic Network

Professional After-Sales Service

■ Request a quote (RFQ) and get a fast response from our sourcing team.

■ Contact us today to discuss your BOM needs and delivery requirements.

Product Applications

Targeted Component Solutions Across Industries

- Supply Chain & Logistics
- Design Engineering
- Automotive & Transportation
- Aerospace & Defense
- Healthcare & Medical
- Consumer Electronics
- Data Centers
- Industrial Automation
- Power Management
- RF & Microwave
- Industrial IoT
- Communications & Networking

Regular Updates

Continuously updated application and component data.

Precise Classification

Clear segmentation by application and IC category.

Full Coverage

Up to 99% coverage across electronic component categories.

One-Stop Solution

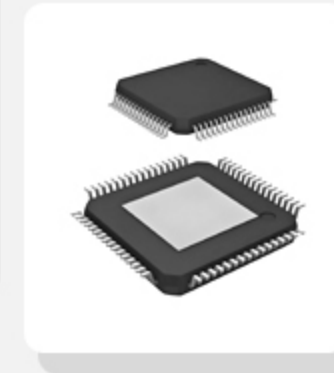

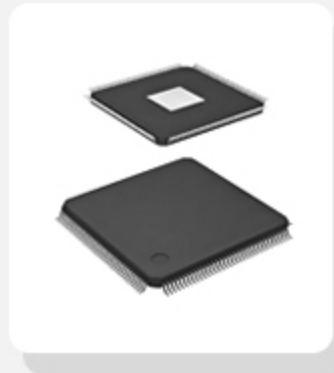

Integrated sourcing for all electronic component needs.

||| DiGi organizes component resources by industry and application, enabling faster and more accurate part selection.

Comprehensive Product Portfolio

20+ Major Categories Covered

Core Components

- Integrated Circuits (ICs)
- Discrete Semiconductor Products
- RF & Wireless
- Circuit Protection
- Isolators

Passive Components

- Resistors
- Capacitors
- Inductors, Coils & Chokes
- Filters
- Crystals, Oscillators & Resonators

Functional & Power Products

- Sensors & Transducers
- Optoelectronics
- Audio Products
- Potentiometers & Variable Resistors
- Power Supplies – Board Mount

Interconnection & Control

- Connectors & Interconnects
- Switches
- Relays
- Transformers

Our product portfolio covers **20+ major electronic component categories**, including ICs and peripheral products, with extensive subcategories and a product library exceeding **1,000,000+ items**.

With sufficient inventory and fast RFQ response, DiGi provides efficient **one-stop sourcing solutions** for global customers.

Certifications & Compliance

Through internationally recognized third-party certifications, we ensure strict quality control, compliance, and operational transparency across our supply chain.

All certifications are independently verified and demonstrate our commitment to quality, safety, and responsible business practices.

ASA

DiGi Professional Distribution

DiGi operates as a global electronic components distribution partner, delivering authentic products, stable supply, and efficient sourcing solutions through a trusted international network.

Integrated Circuits (ICs)

We distribute a wide range of IC products from leading manufacturers such as ADI, NXP, Texas Instruments, STMicroelectronics, Microchip, ON Semiconductor, Infineon, Broadcom, Maxim, Cypress, and Toshiba. Our sourcing capability supports standard, alternative, and end-of-life IC components.

Power Semiconductors & IGBT Modules

Our portfolio includes power devices and modules from global brands such as Infineon, Mitsubishi, Fuji Electric, Semikron, IXYS, IR, ABB, and Toshiba, supporting industrial, energy, and automation applications.

Quality Warranty

Counterfeit & Substandard Prevention

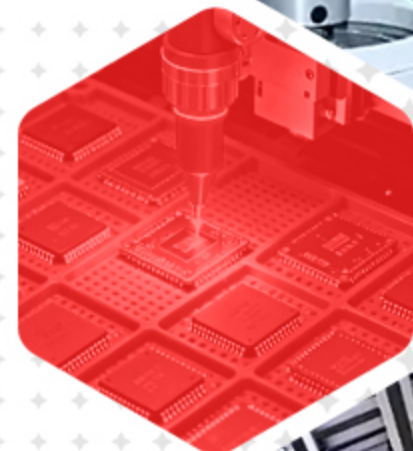

We implement a multi-layer inspection process to prevent counterfeit and substandard components from entering the supply chain, following recognized industry standards.

- Documentation & Packaging Inspection
- External Visual Inspection
- X-ray Analysis
- Electrical Testing
- Decapsulation (as required)

Failure Analysis Support

When required, failure analysis helps identify potential root causes of component issues, supporting quality improvement and corrective actions.

- SEM / EDX
- SAM
- Cross-section Analysis
- Electrical Verification

DiGi is committed to delivering authentic, reliable electronic components through standardized quality management, strict inspection procedures, and continuous improvement.

Every product is subject to quality control to ensure compliance, reliability, and performance—so customers can source with confidence.

Lifecycle and reliability testing

Reliability and lifecycle evaluations assess component performance under simulated operating and stress conditions to ensure long-term stability in real-world applications.

- Thermal Cycling / Thermal Shock
- Burn-in
- Vibration & Drop Testing
- Environmental Stress (Temperature & Humidity)

Electrical & Functional Testing

Electrical and functional testing verifies key performance parameters, ensuring components meet specification requirements before shipment.

- Functional Testing
- Curve Tracing
- DC / AC Characteristics
- Temperature Range Verification

1350+

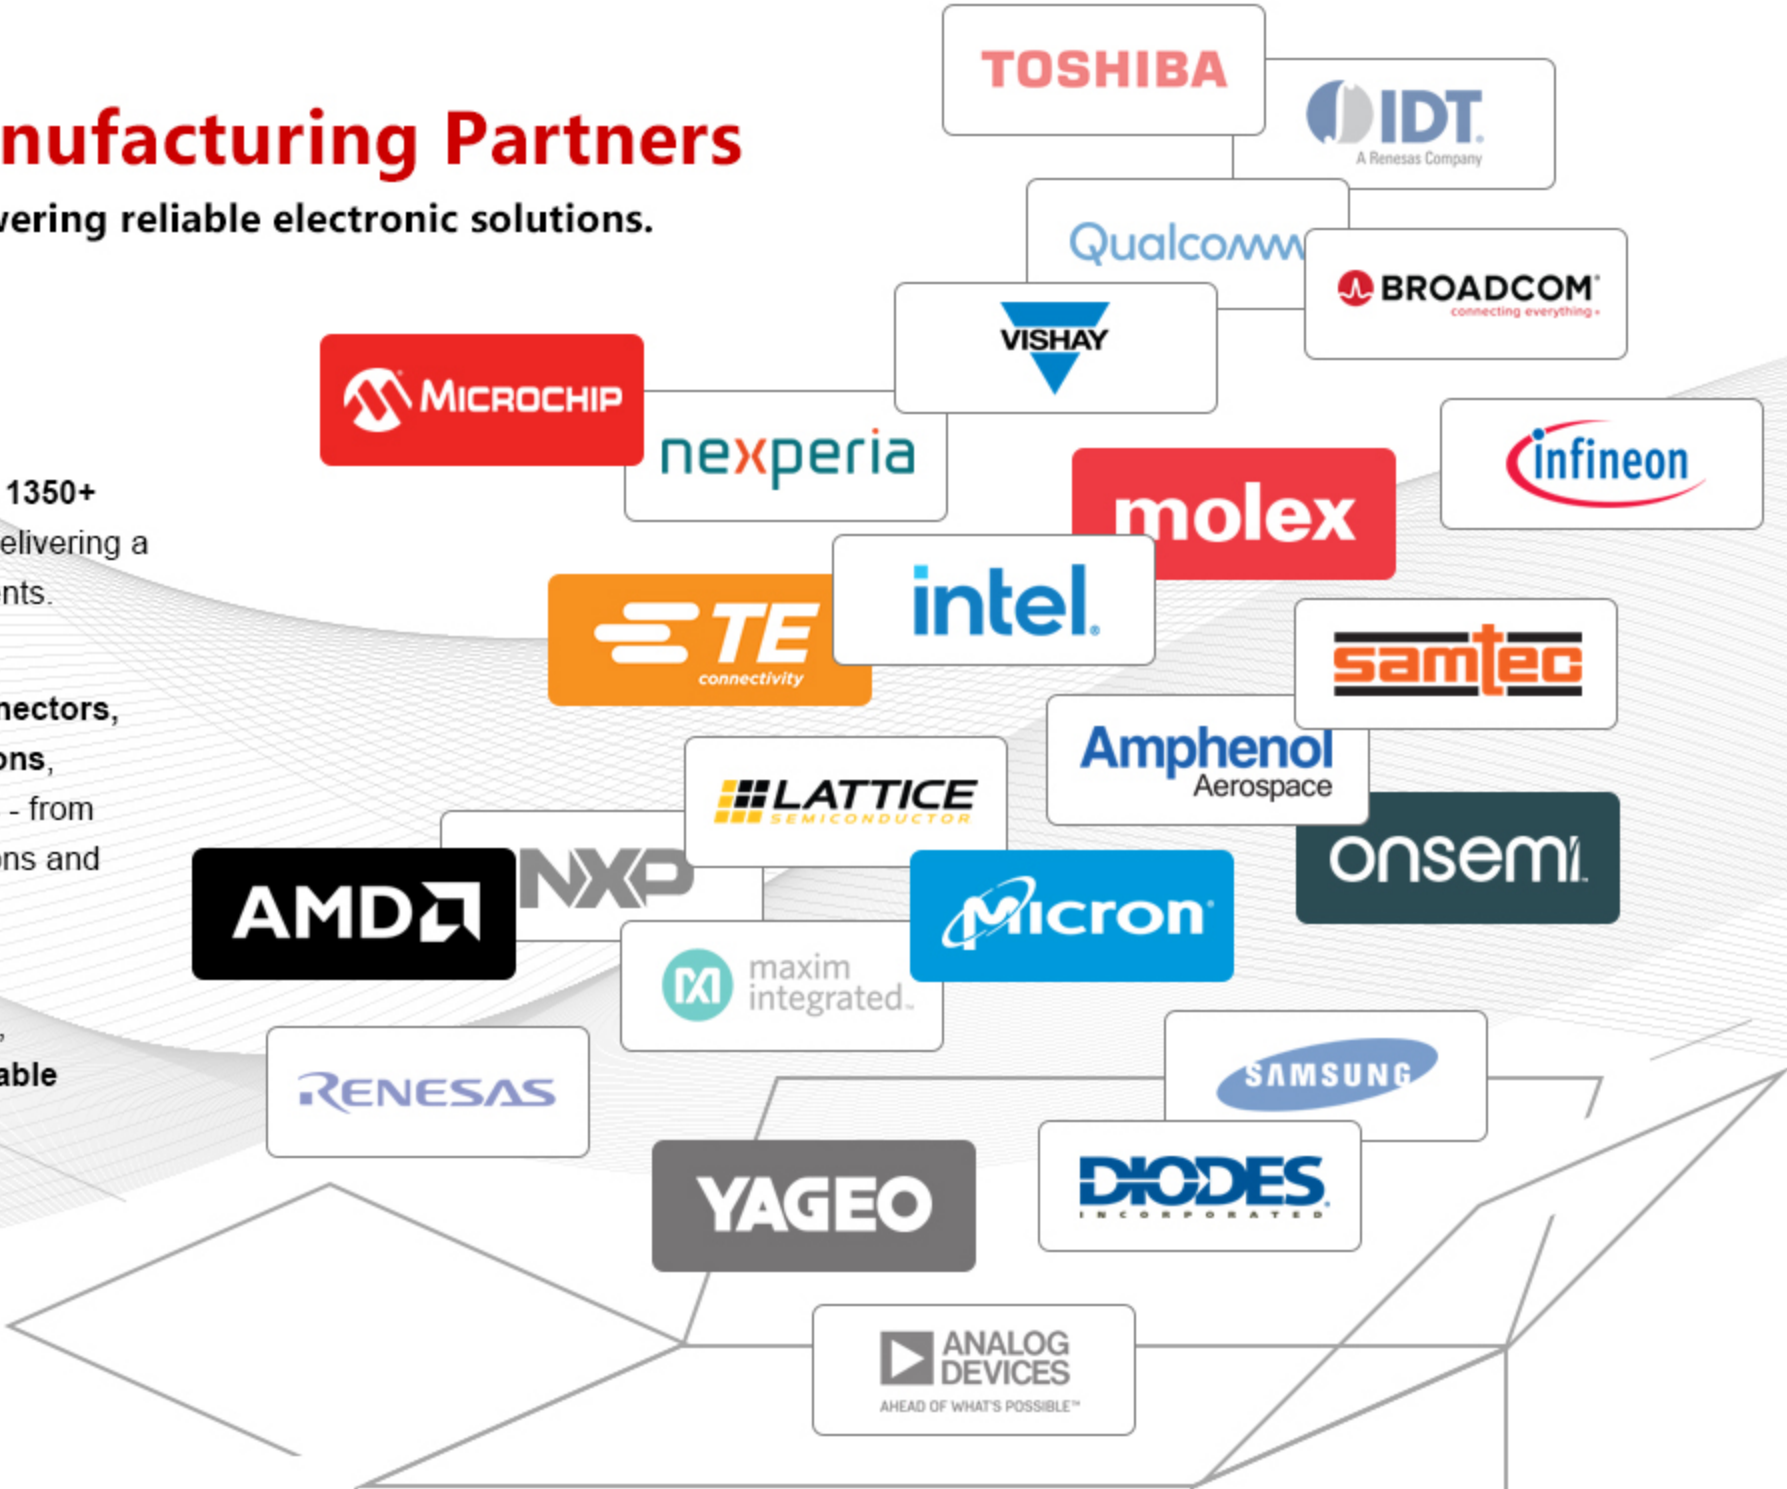

Global Manufacturing Partners

Trusted brands powering reliable electronic solutions.

DiGi Electronics HK Limited collaborates with **over 1350+ leading electronics manufacturers worldwide**, delivering a diverse and reliable portfolio of electronic components.

Our partnerships span **ICs, semiconductors, connectors, passives, power devices, and embedded solutions**, enabling us to support a wide range of applications - from industrial and automotive systems to communications and consumer electronics.

By working closely with globally recognized brands, we help customers ensure **authentic sourcing, stable supply, and long-term product availability**.

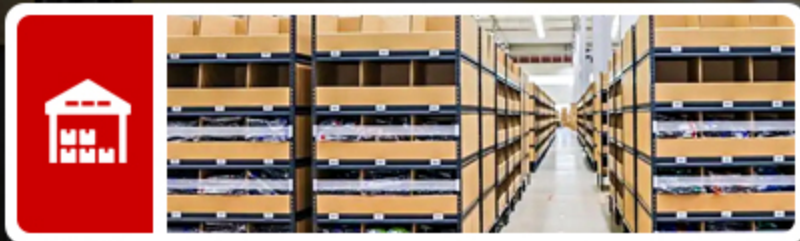

Representative brands shown.
Full portfolio includes **1350+** global manufacturers.

Warehousing & Logistics System

A modern, intelligent warehousing infrastructure integrating **inventory management, order processing, and global logistics coordination.**

Sufficient Inventory Availability

Strategic inventory planning supports urgent and ongoing project requirements.

Fast & Reliable Order Fulfillment

Optimized picking, packing, and dispatch processes ensure timely shipment worldwide.

Flexible Global Sourcing

Multiple sourcing channels enable rapid response to shortages and special requirements.

DiGi operates a modern warehousing system designed to support fast order fulfillment, accurate inventory control, and reliable global delivery.

Through optimized storage management and intelligent sorting processes, we help customers shorten lead times and improve supply chain efficiency.

► Development History

Building a Trusted Global Electronic Components Distribution Network

2010

Company Founded

DiGi Electronics HK Limited was established in Hong Kong, marking the beginning of our commitment to professional electronic components distribution and global sourcing services.

2014

Global Sourcing System Upgrade

A global sourcing and supplier management system was implemented, significantly improving order efficiency, accuracy, and response time.

2018

Brand Portfolio Expansion

DiGi's product portfolio expanded to cover 500+ global IC and electronic component brands, significantly enhancing sourcing flexibility.

2012

Initial Business Expansion

Core sales and sourcing teams were established, enabling DiGi to support customers with more efficient procurement and responsive service.

2016

Warehousing & Logistics Capability Established

Self-operated warehousing and logistics systems were completed, strengthening inventory management and global delivery reliability.

▶ **15+**
YEARS

15+ Years of Industry Experience

Since 2010, DiGi Electronics has been dedicated to electronic components distribution.

We represent over **1,300 leading IC brands** and serve **163,000+ customers** across **200+ countries and regions**, delivering authentic components and reliable global supply solutions.

2020

Stable & Scalable Development

Business operations continued to grow steadily, with improvements in IC sourcing capability, customer service systems, and supply chain stability.

2024

1,300+ Brand Coverage Achieved

DiGi collaborates with over 1,000 leading electronics manufacturers, offering a broad and reliable product range for diverse industries.

2019

Global Customer Base Growth

Serving over 100,000 customers worldwide, DiGi strengthened its position as a reliable partner for OEMs, EMS providers, and engineering teams.

2022

One Million+ IC Products Available

DiGi's platform expanded to over 1,000,000 IC component SKUs, covering mainstream, hard-to-find, and obsolete parts.

2025

Continuous Breakthrough

DiGi continues to optimize its sourcing network and service model, focusing on cost efficiency, supply stability, and long-term customer value.

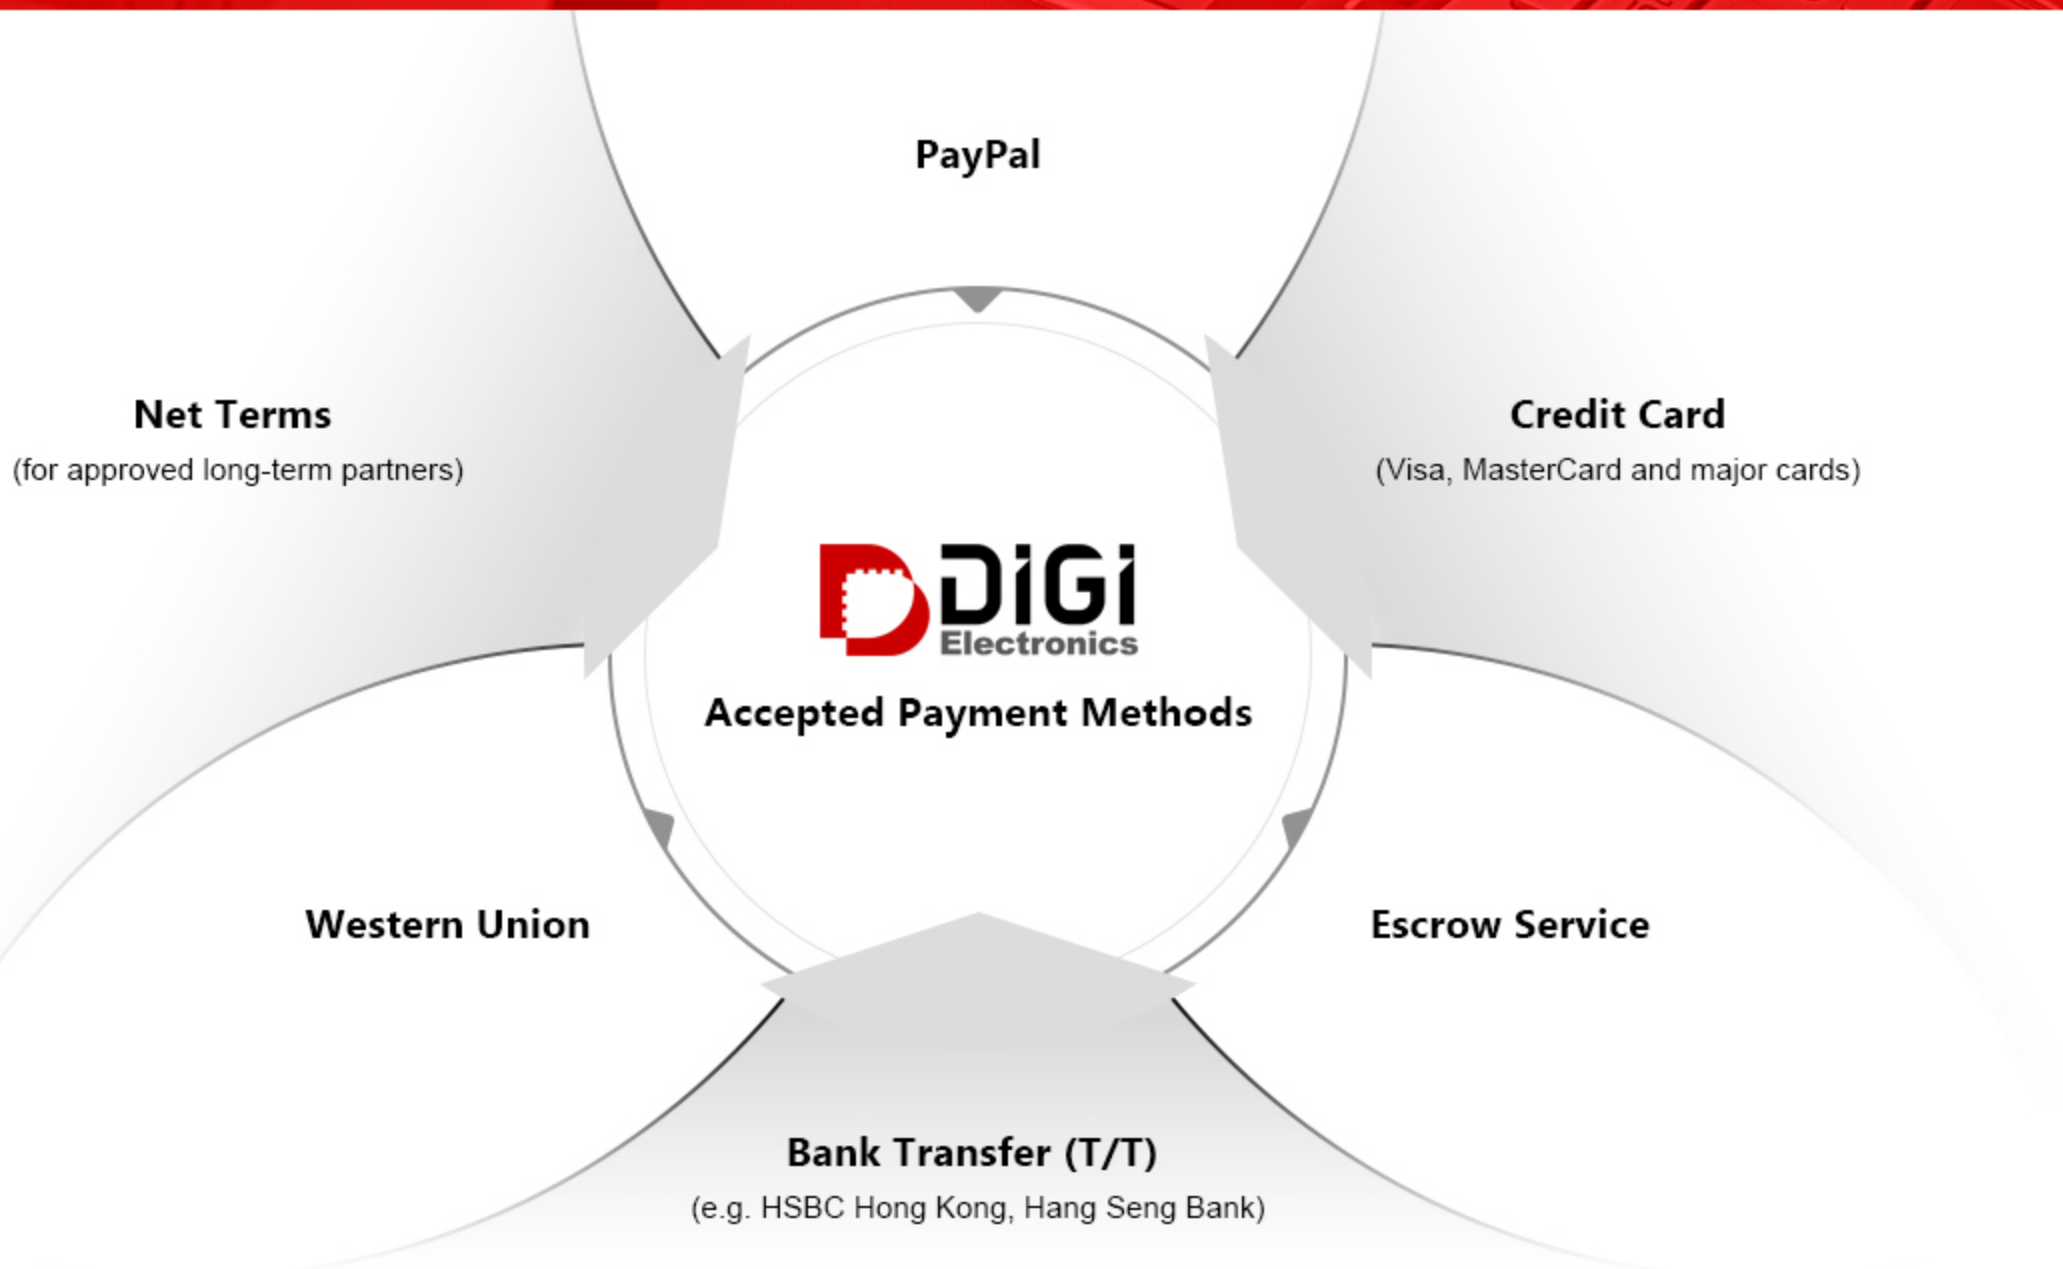

Payment Methods

We offer secure and flexible payment options to support global transactions.

All payments are processed through trusted financial institutions to ensure transaction security and reliability.

Global Shipment

DiGi provides fast and reliable worldwide shipping through leading international logistics partners.

Shipping Carriers:

- DHL Express
- FedEx
- UPS
- SF Express
- Other international couriers

Delivery Time:

- In-stock items are typically ready to ship within 1–2 business days
- Estimated transit time: 5–7 business days, depending on destination and carrier

Shipping Options:

- Customers may use their own DHL / FedEx / UPS accounts
- Flexible shipping arrangements are available upon request

Our logistics network ensures timely delivery, order visibility, and secure handling worldwide.
